†'**pamphil**. *Obs. rare.* [Cf. next.] A memorandum or note.

1571 SIR T. SMITH *Let. to Ld. Burleigh* 3 Mar. in Digges *Compl. Ambass.* (1655) 192 The next day..Mr. de Foix came to us and brought us a draught of the whole League in French,..we perused it with our Pamphils, as Mr. Hall termeth them, *schediæ* or *adversaria*..(some other tho will have them called pieces, as some Frenchmen do name them).

pamphlet ('pæmflɪt), *sb.* Forms: [4 *panfletus*], 4-7 pamflet, (6 pamflete, -flett(e, 5 pamfilet, pampelet, paunflet, plaun-); 6- pamphlet, (6 pamphelet, 7 -lett(e), pamphlete, -lette, pampfelette. [Appears in 14th c. in Anglo-Latin (*panfletus*), English (*pamflet*, 15th c. *pamfilet*, *paunflet*); app. a generalized use of *Pamphilet* or *Panflet*, a familiar name of the 12th c. Latin amatory poem or comedy called *Pamphilus, seu de Amore* (in OF. *Pamphilet*, MDu. *Panflet*), a highly popular opuscule in the 13th c. Cf. the familiar appellations of other small works similarly formed with dim. *-et*, e.g. *Catonet* the Distichs of (pseudo-) Cato, *Esopet*, the Fables of Æsop, etc. (See note below.) Hence in 17-18th c. adopted in French and other langs.]

1. A small treatise occupying fewer pages or sheets than would make a book, composed and (*a*) written, or (*b*) (since *c* 1500) printed, and issued as a separate work; always (at least in later use) unbound, with or without paper covers.

In a general sense used irrespective of subject (applied e.g. in 1495, to a codicil to a will, of only about 170 words), and in 17th c. including issues of single plays, romanccs, poems, novelettes, newspapers, news-letters, and other periodicals; still sometimes applied to chap-books, and the likc; but not now usually to anything of purely literary character, or of religious nature, even though issued 'in pamphlet form'.

2. More specifically, a treatise of the size and form above described on some subject or question of current or temporary interest, personal, social, political, ecclesiastical, or controversial, on which the writer desires to appeal to the public.

This is mercly a consequential specialization, arising from the fact that works of this kind are those for which the pamphlet form is now mainly employed.

[*Note.* The amatory poem of Pamphilus appears as *Panflet* in the Middle Dutch *Floris & Blauncheſleur* of Diderik van Assenede (*c* 1250) I. 333, where it is said of the hero and heroine 'Ende men se oec te lesene sette In Juvenale ende in Panflette, Ende in Ovidio de Arte Amandi' (And they were set also to read In Juvenal and in Panflet, And in Ovid on the Art of Loving). In French, *Pamphilet* appears in the inventory of the Library of the Louvre (Chas. V, and Chas. VI) dispersed by John, Duke of Bedford (L. Delisle *Cabinet des Manuscrits* III. 160). As to its popularity, the students of the University of Paris were rebuked because they preferred this erotic production to more edifying reading. Pamphilus was also well known in England, and is twice quoted or referred to by Chaucer; also by Gower *Mirour* 14449 (where see Editor's note). To connect the work with our 'pamphlet', we have to suppose that here also, as in France and the Low Countries, it was familiarly termed *Pamphilet* or *Panflet*, and that this name was in course of time extended to other opuscula produced or circulated 'in pamphlet form', i.e. as small detached works. This transference of sense must have been complete before 1340, when the name was applied in *Philobiblon* to what were evidently serious treatises, and before Thomas Usk, Hoccleve, and Lydgate applied it to single works of their own.]

pan (pæn), *sb.*[1] Forms: 1-7 panne, (1 ponne, 4-5 ponne), 4- pan, (5 pon, 6 pane). Icel. *panna* (late 14th c.), Sw. *panna,* Da. *pande,* prob. from LG.; not found in Gothic. From its occurrence in OE. as well as in Continental WGer., and its having in OHG. *pf* for *p,* the word was evidently Com. WGer. in 4th or 5th c., but its ulterior history and origin are uncertain.

Some think it a (prehistoric) adaptation of L. *patina, patena,* in same sense (as **pat'na,* **padna, panna*), but there are obvious difficulties. A med. (Ger.) L. *panna* occurs in 12th c. Pan (pæn), *sb.*[2] [a. Gr. *Πάν*.] The name of a Greek rural deity, represented as having the head, arms, and chest of a man, while his lower parts were those of a goat, of which he sometimes also bore the horns and ears.

The original seat of his worship was in Arcadia, and he was supposed to preside over shepherds and flocks, and to delight in rural music; he was also regarded as the author of sudden and groundless terror seizing upon beasts or men (PANIC); in later times, from association of his name with *τὸ πᾶν* the all, everything, the universe, he was considered as an impersonation of Nature, of which his attributes were taken as mysterious symbols.

pan, obs. form of PANE; obs. Sc. form of PAIN.

pan-, combining form and formative element, repr. Gr. *παν-* from *πᾶν*, neuter of *πᾶς* all, which was freely used in Greek, esp. with adjs. to which it stood in advb. relation in the sense 'all, wholly, entirely, altogether, by all, of all', as in *πανάγαθος* altogether good, *πανάγιος* all-holy, *πανακής* all-healing, *πανάριστος* best of all, *παναρμόνιος* suited to all musical modes, *πάνδημος* pertaining to all the people, public, *πάνοπλος* fully-armed, *πανσέληνος* of the full moon, *πάνσοφος* all-wise; so from national names, as *πανελλήνιος* of all the Greeks, *πανιώνιος* of all the Ionians; also in sbs., etc. derived from these adjs., and some other sbs., as *πανδέκτης* an all-receiver, *πανηγεμών* ruler of all, *πανήγυρις* a universal or general assembly, *πανοπλία* panoply.

Hence *pan-* occurs in English in words taken or derived from Greek, and in many others formed more or less on the same analogy either in English, med. or mod. Latin, or French. It is especially common with national names, after *πανελλήνιος*, *πανιώνιος*, etc., where it has become a living suffix, prefixed whenever needed. Before a labial *παν-* became *παμ-*, and before a guttural *παγ-* (= *παη-*), as *πάμφιλος*, *παμφίλητος* beloved of all, *πάγκρεας* the sweetbread, the pancreas; the former of these is retained in some English derivatives (see PAM-).

The following are examples of the uses of *pan-*; the more important words will be found in their places as Main words.

Pandora[1] (pæn'dɔərə). Also 7 Pandore. [a. Gr. *Πανδώρα* lit. 'all-gifted', f. *παν-* all + *δῶρον* gift.] In Greek mythology, the name of the first mortal woman, on whom, when made by Vulcan and brought to Epimetheus, all the gods and goddesses bestowed gifts.

1633 J. FISHER *Fuimus Troes* I. iv. in Hazl. *Dodsley* XII. 461 To frame the like Pandore, The gods repine, and nature would grow poor. **1643** MILTON *Divorce* II. iii, The Academics and Stoics, who knew not what a consummat and most adorned Pandora was bestow'd upon Adam.

Hence **Pandora's box**: the gift of Jupiter to Pandora, a box enclosing the whole multitude of human ills, which flew forth when the box was foolishly opened by Epimetheus; according to a later version, the box contained all the blessings of the gods, which, on its opening, escaped and were lost, with the exception of hope, which was at the bottom of the box. Hence in fig. and allusive uses.

pandora[2] (pæn'dɔərə), **pandore** (pæn'dɔə(r)). Also 7-8 pandure, (8 pandola), 9 pandura, pandur. [a. It. *pandora* (also *pandura*), F. *pandore*, ad. L. *pandūra*, a. Gr. *πανδοῦρα*, a musical instrument the invention of which was attributed to Pan. (But the word was prob. of foreign origin.)]

A stringed musical instrument of the cither type, the same as the BANDORE.

The original Greek and Roman *pandura* is described as a kind of lute with three strings; such an instrument is still used in some eastern lands under the name *pandur*. But the original type has, at different times, and in different countries, undergone many changes in form, in the number and material of the strings, the use or non-use of a plectrum, etc. Equally numerous are the modifications of the name: cf. BANDORE, BANJO, MANDOLINE. The changes of thing and name have not always gone together: the Neapolitan *pandura*, for instance, retaining the ancient name, is 'a musical instrument larger than the mandoline, strung with eight metal wires, and played with a quill'.

pandour, pandoor ('pændʊə(r)). Also pandur. [= F. *pandour*, Ger. *pandur*; all a. Serbo-croatian *pàndūr*, 'a constable, bailiff, beadle, summoner, or catchpole; a mounted policeman or guardian of the public peace; a watcher of fields and vineyards', having also in earlier times the duty of guarding the frontier districts from the inroads of the Turks. For ulterior etymology see Note below. The sense in which the word became known in Western Europe is involved in the history of Trenck's body of pandours.]

1. In *pl.* The name borne by a local force organized in 1741 by Baron Trenck on his own estates in Croatia to clear the country near the Turkish frontier of bands of robbers; subsequently enrolled as a regiment in the Austrian Army, where, under Trenck, their rapacity and brutality caused them to be dreaded over Germany, and made *Pandour* synonymous in Western Europe with 'brutal Croatian soldier'.

‖2. In local use, in Croatia, Servia, Hungary, etc.: A guard; an armed servant or retainer; a member of the local mounted constabulary.

1880 *Sat. Rev.* 7 Feb. 178/2 A small body of guards, called pandours, is, by immemorial usage, attached to the establishment [the monastery of St. John of Rylo]. **1886** W. J. TUCKER *E. Europe* 155 The 'pandurs' came to fetch him, and..dragged him before the commission. *Ibid.* 169 These Pandurs, your police, your mounted constabulary, or whatever you call them, are they of no use?

[*Note.* The word *'pandūr*, with all or some of the senses mentioned above, is found in nearly all the South-Slavonic (Servian) dialects, and in Magyar, also as *pan'dur* in Roumanian; it has entered Turkish as *pan'dul*. Earlier forms in Magyar and Serbo-croatian were *bàndūr*, *bàndor*; the former is still used in and near Ragusa. The word is not native either in Magyar or Slavonic, and the question of its origin and course of diffusion in these langs. is involved in considerable obscurity. But Slavonic scholars are now generally agreed in referring it through the earlier *bàndūr*, *bàndor*, to med.L. *banderius*, orig. 'a follower of a standard or banner' (see BANNER), or to some Italian or Venetian word akin to this. Among senses evidenced by Du Cange for *banderius* (and *bannerius*), are those of 'guard of cornfields and vineyards', also 'summoner, apparitor', which are both senses of *pàndūr*; It. *banditore* (Venetian *bandiore*) has also the sense of 'summoner'. The alleged derivation of the word from Pandur or Pandur Puszta, 'a village in Lower Hungary', given in Ersch & Grüber's Cyclopædia, and repeated in many English Dictionaries, is absolutely baseless.]

6. *Scots Law.* **a.** In the phrase *on* or *upon the panel* = upon (his, one's) trial. Also, in later use, *in the panel*, etc.

The original sense of *panel* here is conjectural. It seems most probable that (on the analogy of sense 4) it meant a slip of parchment, containing the indictment, or the name or names of the persons indicted. *To be on the panel* would thus be *to be indicted*, and so on one's trial. It would also be easy to use the term elliptically for the name or names, and so, the person or persons, on the panel, as in b, where note that the word is collective. In later times, 'the panel' has been sometimes understood as a place, viz. 'the bar of the court' (so Jamieson), or the dock. Cf. the phrases *in the panel*, to put or bring *into the panel*, to enter *the panel*.

1889 POULTON, etc. tr. *Weismann's Ess. Heredity* 90 This suspension of the preserving influence of natural selection may be termed *Panmixia*, for all individuals can reproduce themselves and thus stamp their characters upon the species, and not only those which are in all respects, or in respect to some single organ, the fittest, .. the great variability of most domesticated animals essentially depends upon this principle. 1889 [see GALTON]. 1890 RAY LANKESTER in *Nature* 27 Mar. 487/2 The doctrine of panmixia is this. When there is no longer, owing to changed conditions of life, any use for an organ, it will cease to be the subject of natural selection. Consequently all possible variations .. will have (so far as the now lapsed use of the organ is concerned) an equal chance. 1890 W. JAMES *Princ. panplain ('pænpleɪn). *Physical Geogr.* Also **-plane.** [f. PAN- + PLAIN *sb.*[1]] A plain formed by the coalescence of previously separate floodplains.

1933 C. H. CRICKMAY in *Geol. Mag.* LXX. 345 We would expect the growing floodplains to become confluent, making one broad universal plain shared by all the streams of the region. The surface will be flat, and will have a general slope like that which now characterizes the lower floodplains of great rivers. The only relief will be remnants of some of the interfluves which may persist as low monadnocks. This plain, formed of floodplains joined by their own growth, may be called a panplain. **1942** O. D. VON ENGELN *Geomorphol.* vi. 97 Eventually the level surfaces of adjacent stream floors, concurrently developed by such planation, become confluent and a panplane, a very level plain with a general downward inclination, is produced. **1960** B. W. SPARKS *Geomorphol.* xv. 340 There seems little doubt that river planation is an important agency of erosion,..but whether these can extend indefinitely to form a panplain seems more doubtful. **1967** J. HAYS in Jennings & Mabbutt *Landform Stud. Austral. & New Guinea* ix. 200 Near Darwin, the panplains of north-flowing and west-flowing streams have coalesced.

panplanation (ˌpænplæ'neɪʃən). *Physical Geogr.* [f. PAN- + PLANATION, after PANPLAIN.] The formation of a panplain.

1933 C. H. CRICKMAY in *Geol. Mag.* LXX. 345 The essential difference between panplanation and peneplanation is that the former starts from the lower floodplains of rivers and grows laterally in all landward directions, whereas the latter is of universal occurrence. **1942** O. D. VON ENGELN *Geomorphol.* xvi. 356 It is now considered improbable that flood-plain accumulation and panplanation (Crickmay, C.H., 1933) combined..could completely dispose of all relief in a peneplaned region. **1970** R. J. SMALL *Study of Landforms* v. 168 Many authorities have regarded lateral plantation by running water as a major factor in the formation of desert surfaces.., and a process akin to panplanation has been assumed by some to account for savanna plains.

1941 *Jrnl. Soc. Motion Pict. Engin.* XXXVII. 130 A special 3-circuit differential junction network, nicknamed 'The Panpot', is used to dub one original track onto one, any two, or all three of our Fantasound program tracks. **1964** H. B. HADDEN *Pract. Stereophony* iii. 39 To present a monophonic signal, as a point source at a given position.., a control known as a 'panoramic potentiometer' is employed... This control, known as a 'panpot' for short, is a two-gang fader with the two halves arranged back to back, so that as the gain of one half of the particular channel is increased, the other half is decreased. **1975** *Gramophone* Dec. 1122/1 The deck was plugged into a large discothèque type console with a quadrophonic pan-pot in the middle.

†b. Applied to other styles, either historically, or in reference to the dress of the stage character, which, according to quot. 1727-41, was at one time of the nature of 'tights'. *Obs.*

The quot. from Chambers is merely translated from the Fr. *Dictionnaire de Trévoux*, and does not prove English usage. In French the name became associated with the tight garments of the 15- 16th c., familiar in the paintings of the Italian artists of the period; but this was nowhere a contemporary application. From this arose the use in c.

c. A tight-fitting kind of trousers fastened with ribbons or buttons below the calf, or, later, by straps passing under the boots, which were introduced late in the 18th c., and began to supersede knee-breeches. d. panther ('pænθə(r)). Forms: 3-6 panter, 4-6 pantere, (5 panteere), 5-6 panthere, (7 -ar), 5- panther. [ME. *pantere*, a. OF. *pantère* (Ph. de Thaun, 12th c.), mod.F. *panthère*, ad. L. *panthēra*, ad. Gr. *πάνθηρ*. (The solitary instance in OE. is merely an alien word from L or Gr.)

The subjective analysis of the name, as from Gr. *παν-* all + *θήρ* beast, gave rise to many fancies and fables: see Ph. de Thaun *Bestiaire* 224, etc.]

1. Another name for the Leopard (*Felis pardus*); popularly applied to large leopards.

As with other exotic animals, the name, handed down from the Latin writers, was known long before the animal; all the early references merely reflect the statements of ancient authors and their mediæval continuators. These statements were long believcd to refer to a beast distinct from the leopard; a belief encouraged by there being two Latin names *panthēra* and *pardus*, as to the relation between which the ancient writers themselves were not clear, and by fabulous notions as to the generation of the leopard as a hybrid between the lion and the 'pard', and as to the sweet fragrance fabled to be exhaled by the panther. Down to modern times (cf. quot. 1813) the 'panther' was supposed to be at least a larger and more powerful kind of leopard, a distinction not scientifically tenable.

panto- (pæntəʊ), before a vowel PANT-, repr. Gr. *παντο-* (*παντ-, πανθ-*), combining form of *πᾶς, πᾶν* (stem *παντ-*) all, already used in ancient Gr. (where often interchangeable with *παν-* PAN-) in forming adjs. and a few substantives used attrib., as *πάνταρχος* (Soph.) all-ruling, *παντοδαπός* of all kinds, *παντοκράτωρ* almighty, *παντοκτίστης* creator of all; in later Gr. it became much more frequent. The word *παντόμῖμος* was adopted in L. as *pantomīmus* and thence came into French and English as *pantomime* before 1600. Otherwise, the formation of words in *panto-* began in the 17th c., and became more frequent in the 19th; but this has not become a living element forming compounds like the cognate PAN- 1 in *Pan-Anglican, Pan-American*, and the like. The chief derivatives of *panto-* appear in their alphabetical places; the following are of minor importance:

3. a. An English dramatic performance, originally consisting of action without speech, but in its further development consisting of a dramatized tale, the dénouement of which is a transformation scene followed by the broad comedy of clown and pantaloon and the dancing of harlequin and columbine. Now a feature of the Christmas holidays.

By the 20th century, the traditional form changed, with the loss of the pantaloon and harlequin features. The entertainment, primarily for children, is now based on the dramatization of a fairy tale or nursery story, and includes songs and topical jokes, buffoonery and slapstick, and standard characters such as a pantomime 'dame', played by a man, a leading boy, played by a woman, and a pantomime animal, e.g. horse, cat, goose, played by actors dressed in a comic costume, with some regional variations.

This expression, says Park (in editing *Harl. Misc.* 1808), 'seems to have been a cant phrase for doing a kind thing in an unkind manner; as it would be so to feed an infant'. para[8] ('pærə). Slang abbrev. of PARAPLEGIC *a.*

1961 PARTRIDGE *Dict. Slang* Suppl. 1213/2 *Para.* 2. A *para*plegic (a spinal-cord paralytic): Canadian doctors' and nurses': since ca. 1946. **1969** *Sun* (Melbourne) 18 Apr. 7/3 I'd like to say it's a disgrace that quadras (quadraplegics) and paras (paraplegics) have to wait so long before courts get around to clearing up the mess.

para-[1] (pærə), before a vowel or *h* usually par-, repr. Gr. *παρα-*, *παρ-*, combining form of *παρά prep.*, occurring in words already formed in Greek, their adaptations, and derivatives, and in modern words formed on the model of these, and, in certain uses, as a living element, in the formation of technical nomenclature.

As a preposition, Gr. *παρά* had the sense 'by the side of, beside', whence 'alongside of, by, past, beyond', etc. In composition it had the same senses, with such cognate adverbial ones as 'to one side, aside, amiss, faulty, irregular, disordered, improper, wrong'; also expressing subsidiary relation, alteration, perversion, simulation, etc. These senses also occur in English derivatives: see PARABAPTISM, PARABLE, PARADOX, PARASITE; PARALLEL; PARENTHESIS; PARHELION; PARISH; PAROCHIAL, PARODY, PAROXYSM, etc. Two groups of less usual technical words follow here.

1. Terms (substantival or adjectival) chiefly of Anatomy and Natural History, denoting or relating to an organ or part situated beside or near that denoted by the second element, or standing in some subsidiary relation to it; of Pathology, denoting diseases affecting such parts, or designating disordered conditions and functions (often Latin in form); and of miscellaneous other terms in the sense 'analogous or parallel to, but separate from or going beyond, that which is denoted by the root word'.

2. In *Chemistry*, *para-* is used to form:

a. Names of substances that are (or have been supposed to be) modifications of those to the names of which *para-* is prefixed, or that have been produced along with or instead of these, or, sometimes, that merely occur with them.

This nomenclature appears to have been first used by Berzelius in 1830 (cf. Poggendorf's *Annalen* XIX. 328, where he introduces *acidum paraphosphoricum* and *paraphosphates*, also *acidum paratartaricum*, *a. parastannicum*).

In some cases the *para-* derivatives are isomers or polymers of the simply-named substance, e.g. *paraldehyde*, *paratoluene*; but in others they are neither isomeric with nor closely related to them, e.g. *naphthalene* $C_{10}H_8$, *paranaphthalene* $C_{14}H_{10}$.

para'benzene (**para'benzol**) $(C_6H_6)_n$, a hydrocarbon isomeric with benzene, occurring along with it in light coal oil. **para'buxine**, an alkaloid, $C_{24}H_{48}N_2O$, obtained from the bark of the box-tree. **paracam'phoric** *a.*, in *p. acid*, inactive camphoric acid. **para'carthamin**, a red substance allied to carthamin, contained in the bark of *Cornus sanguinea*, dogwood. **para'casein**, a phosphoprotein produced as a calcium compound in the form of a curd by the action of rennet on milk; hence **para'caseinate**, a compound of paracasein with a metal. **para'cellulose**, a supposed modification of CELLULOSE, occurring in the cellular tissue and pith of plants. **para'citric** *a.*, in *p. acid* = ACONITIC *acid*. **para'conic** *a.* [ACONIC], in *p. acid*, one of the isomeric acids of constitution $C_5H_6O_4$. **pa'raconine**, an artificial variety of CONINE, $C_8H_{15}N$, differing from it in some of its chemical reactions and physical qualities. **para'cresol**, one of the toluol alcohols found in urine; hydroxyltoluene. **para-e'llagic** *a.*, in *p. acid* = RUFIGALLIC *acid*. **para'fibrin**, a supposed modification of fibrin occurring in certain morbid conditions (*Syd. muscle; **paramyo'sinogen**, a proteid occurring in muscle-plasma. **para'naphthalene** = ANTHRACENE. **pa'raniline**, a polymer of ANILINE, $C_{12}H_{14}N_2$, obtained in long white silky needles. **pa'ranthracene**, a crystalline isomeric modification of anthracene: see quot. **para'pectic** *a.*, in *p. acid*, $C_{24}H_{34}O_{23}$, an uncrystallizable acid formed from pectic acid or pectin by long boiling, or by the action of pectose. **para'pectin**, a neutral substance, $C_{32}H_{46}O_{31}$, derived, as a translucent jelly, from pectin by boiling and precipitating with alcohol. **para'peptone**, a substance allied to syntonin, precipitated on neutralizing the action of gastric juice on egg-albumin. †**parapho'sphoric** *a.*, in *p. acid*, Berzelius's name for pyrophosphoric acid; its salts are **paraphosphates**. **para-'picoline**, an oily base, $C_{12}H_{14}N_2$, a polymer of PICOLINE, and formed from it by the action of sodium. **para'protein** [a. Fischer 1878, in *Ann. der Chem.* CXCIV. 266)], a colourless, crystalline alcohol $(H_2NC_6H_4)_3COH$, which is used in making triphenylmethane dyes and whose red hydrochloride is used as a biological stain. **para'saccharose**, an isomeric modification of saccharose or cane-sugar, $C_{12}H_{22}O_{11}$, formed by a special fermentation of a solution of sugar-candy: see quot. **para'salicyl**, the salicylide of benzoyl, $C_{14}H_{10}O_3$; also called *spirin*. **para'sorbic** *a.*, in *parasorbic acid*, an isomer of SORBIC *acid*, $C_6H_8O_2$, a volatile oily liquid obtained from mountain-ash berries. **para'stannic** *a.*, in *p. oxide*, a name given by Berzelius to the calcined form of stannic oxide, which differs in some properties from the ordinary oxide. **paratar'taric** *a.*, in *p. acid* (Berzelius, 1830) = RACEMIC *acid*; **para'tartramide** = *racemamide* (see AMIDE 2). **para'toluene**, an isomer of TOLUENE, C_7H_8, along with which it occurs in light coal-tar oil; also **para'toluol**. **para'xanthine**, a substance, $C_{15}H_{17}N_9O_4$, having relations with the xanthine group, obtained by Salomon from urine. b. (More systematically) Names of isomeric benzene di-derivatives in which the two hydrogen-atoms replaced by another element or radical are symmetrically disposed in the benzene ring, being separated on each side by two other atoms; as 1 and 4 in the ring $1\,^{2}\,^{3}_{6}\,^{5}\,4$; e.g. *paradichlorobenzene*, $C_6ClHHClHH$. So *coumaric* (1 : 2) and *paracoumaric* (1 : 4) *acids*, etc. See ORTHO- 2.

There are thus three substances, catechol, resorcinol and quinol, all having the same composition $C_6H_4(HO)_2$ and distinguished from each other by the prefixes *ortho*, *meta*, and *para* attached to dihydroxybenzene.

A para-aortic body is defined as an encapsulated collection of chromaffin cells lying in intimate contact with the sympathetic nervous system and yielding a pressor substance after extraction. **1959** R. D. LOCKHART et al. *Anat. Human Body* 488/2 The paraganglia, small brownish masses,..are similar to the suprarenal medulla... The largest masses, the para-aortic bodies, a third of an inch long at birth, lie on each side of the inferior mesenteric artery. **1965** [see PARAGANGLION]. **1973** *Gray's Anat.* (ed. 35) 144/1 Chromaffin organs are found in connection with certain..of the secondary plexuses of the sympathetic system; the largest members of this series are the para-aortic bodies,..commonly termed paraganglia. *Ibid.* 1381/2 The para-aortic bodies..attain their maximum size in the first three years of post-natal life, when the largest takes the form of two elongated brownish bodies..which lie on each side of the inferior mesenteric artery. *Ibid.*, The chromaffin cells of the paraganglia and para-aortic bodies.

parabanic (pærəˈbænɪk), *a. Chem.* [f. PARA-: see below.] In *parabanic acid*, a dibasic acid, CO·2(NH·CO), produced by the action of nitric acid on uric acid or alloxan; crystallizing in colourless prisms. When boiled with dilute acids, it is converted into oxalic acid and urea, whence it is sometimes called *oxalyl carbamide* or *oxalyl urea*. Hence '**paraban**, a proposed substitute for the name *parabanic acid*, to express its parallelism to *alloxan*. '**parabanate**, a salt of parabanic acid, as *argentic parabanate*, CO·2(NAg·CO).

1857 MILLER *Elem. Chem.* III. 635 Parabanic acid forms salts which are exceedingly unstable: parabanate of silver being the only salt which is permanent. **1866** ODLING *Anim. Chem.* 43 Paraban and alloxan are products of the oxidation of uric acid. **1873** RALFE *Phys. Chem.* p. xxviii, Kreatin is a monureide, and so are paraban and alloxan, which are obtained by the oxidation of uric acid. **1888** REMSEN *Org. Chem.* 203 Parabanic acid is formed by boiling uric acid with strong nitric acid and other oxidizing agents.

[*Note.* The term *parabanic* was introduced by Liebig and Wöhler in 1838 (*Annalen* XXVI. 285), but without any explanation of its formation. As they made parabanic acid by a reaction in which they expected to obtain alloxan, it is prob. that *para-* was used in the sense 'instead of', 'opposed to', the ending being that of *allox-an*, *-anic*, and the *b* merely euphonic. It has been suggested that the latter is a residue of *carb-*, and that the term was formed to express parallelism of constitution to urea or carbamide, CO·2(NH_2), and to alloxan, CO·2(NH·CO)CO; but as a fact, it was not till much later that the identity of urea and carbamide was discovered.]

parabaptism (pærəˈbæptɪz(ə)m). [ad. late Gr. *παραβάπτισμα* irregular or spurious baptism, f. *παρα-* aside, amiss, wrong + *βάπτισμα* baptism.] Uncanonical or unauthorized baptism (in the early church). So **para'baptist**, **parabapti'zation**.

It is reported by Proclus in his Commentaries on the first book of Euclid.. that the terms *parabola, hyperbola*, and *ellipse* had been used by the Pythagoreans to express the equality or inequality of areas, and were subsequently transferred to the conic curves.

[*Note.* To the earlier Greek geometers, including Archimedes, B.C. 287-212, who investigated only sections perpendicular to the surface of the cone, the parabola was known as *ὀρθογωνίου κώνου τομή* = sectio rectanguli coni 'the [perpendicular] section of a right-angled cone'. The use of *παραβολή*, 'application', in this sense is due to Apollonius of Perga, *c* 210 B.C., and, with him, referred to the fact that a rectangle on the abscissa, having an area equal to the square on the ordinate, can be 'applied' to the latus rectum, without either excess (as in the *hyperbola*), or deficiency (as in the *ellipse*). (See C. Taylor *Anct. & Mod. Geom.* 195; T. L. Heath *Apollonius of Perga*, Introd. lxxx.) But an explanation of the name, from the much more obvious property of the *parallelism* of the section to a side of the cone, is given by Eutokius of Ascalon *c* A.D. 550, and is frequent in later writers.]

1718 G. CHEYNE *Philos. Princ. Relig.* 32 The Paracentrical Motion is compounded of two others, viz...[that] whereby all Bodies moving in a Curve, endeavour to recede from the Center by the Tangent, and the Attraction of the Sun or the Gravitation of the Planet toward it.

paracentric (pærə'sɛntrɪk), *a.*² *Cytology.* [f. PARA-¹: cf. -CENTRIC 2.] Involving only the part of a chromosome at one side of the centromere. Opp. PERICENTRIC *a.* 2.

1938 H. J. MULLER in *Collecting Net* XIII. 187/2 If the breaks were to one side of the centromere, the inversion may be termed 'paracentric', and it will be noted that the proportions of the two arms, and hence the general shape of the chromosome as seen at mitosis, is not changed. But if the breaks included the centromere between them, being 'pericentric', the mitotic chromosome will have the relative sizes of its two arms altered, except in the special case in which the two distal sections are sensibly equal in size. **1957** C. P. SWANSON *Cytol. & Cytogenetics* xv. 485 Paracentric inversions are by far the most common type of aberration found in natural populations. **1975** *Nature* 3 July 40/1 Heterozygosity for a paracentric inversion, that is, a structural rearrangement in which a chromosome segment that does not include the centromere is rotated through 180°, results in suppression of recombination in the inversion region.

parachor ('pærəkɔ:(r)). *Chem.* [f. 1924 S. SUGDEN in *Jrnl. Chem. Soc.* CXXV. I. 1178 The quantity P can be regarded as function of chemical composition. For saturated substances, P is an additive function... It is proposed to name this quantity the parachor..to signify comparative volume. **1940** GLASSTONE *Textbk. parachute ('pærəʃu:t), *sb.* [a. F. *parachute*, f. PARA-[2] + *chute* fall.]

1. An apparatus used for descending safely from a great height in the air, esp. from a balloon or, more recently, from an aircraft; it is constructed like a large umbrella, so as to expand and thus check the velocity of descent by means of the resistance of the air.

1785 *Europ. Mag.* VII. 401 In Mr. Blanchard's late visit to this country, he brought his Parachute to England. 1837 *Gentl. Mag.* Aug. 190/2 After the parachute was divided from the car, the balloon rose rapidly. 1940 *Chambers's Techn. Dict.* 613/1 *Free parachute*, a parachute to be released or opened by the falling person. 1974 *Encycl. Brit. Micropædia* VII. 740/3 Sport parachutes have large holes that permit the air to escape and drive the parachute in the direction opposite the hole, much like a low-power jet engine.

2. *gen.* Any contrivance, natural or artificial, serving to check a fall through the air, or to support something in the air; e.g. the expansible fold of skin or *patagium* in the flying squirrel, etc. Also *transf.*

1796 STEDMAN *Surinam* II. 17 These [flying squirrels] have..a membrane..which when they leap, expands like the wing of a bat, and by this, like a parachute, they rest on the air. 1833 SIR C. b. *Watchmaking.* A contrivance to prevent injury to the balance-wheel from a shock or blow.

1884 F. J. BRITTEN *Watch & Clockm.* 184 The idea of the parachute is that if the watch is let fall..the balance staff pivots may be saved from breaking by the yielding of the end stones.

1. A colourless (or white), tasteless, inodorous, crystalline, fatty substance, solid at ordinary temperatures (chemically a mixture of hydrocarbons of the series C_nH_{2n+2}), discovered by Reichenbach in 1830; obtained by dry distillation from wood, coal, peat, petroleum, wax, and other substances, and also occurring native in coal and other bituminous strata; subsequently used for making candles, as a waterproofing material, for electrical insulators, and for various other purposes.

3. *Chem.* A general name, introduced by Watts 1872, for the saturated hydrocarbons of the series C_nH_{2n+2}, of which the first four members, methane, ethane, propane, quartane (see -ANE) are at ordinary temperatures gaseous, those higher in the series, oily liquids, and those higher still, solids; all are remarkable for their chemical indifference, the hydrogen being combined in the highest proportion possible with the carbon.

1872 WATTS *Dict. Chem.* VI. 705 This substance is a hydrocarbon or a mixture of hydrocarbons of the series C_nH_{2n+2}; .. the name paraffin may therefore be conveniently used as a generic term for the whole series. **1873** —— *Fownes' Chem.* 545 Many of the paraffins occur ready-formed in American petroleum. **1894** *Scharlemmer's Rise & Devel. Org. Chem.* 92 Henry Watts proposed to call the whole series the *paraffins*, and this name has been accepted.

4. *attrib.* and *Comb.*, as ***paraffin candle, heater, lamp, -refiner, stove, tin***; **paraffin oil**, any one of several oils obtained by distillation of coal, petroleum, and other substances (chemically, liquid members of the paraffin series (see 3), or mixtures of these, often with admixture of other hydrocarbons), used as illuminants and lubricants; also called simply *paraffin* (see 2), *kerosene*, or *petroleum*; **paraffin scales**, manufacturers' name for a crude solid paraffin; **paraffin test** (see quots.); **paraffin wax**, solid paraffin (= sense 1), as distinct from *paraffin oil*.

ZIMMERMAN et al. *Atlos Tumors Nervous Syst.* 177/1 The chromaffin tumors are found most commonly in the adrenal medulla... 1907 *Med. Rec.* (N.Y.) 3 Aug. 188/2 These occur in the medullary substance of the adrenal bodies, in the so-called paraganglia of the same organs. **1930** MAKSIMOV & BLOOM *Textbk. [*Note.* This word appears first in Italian (14th c.), whence in Fr., Sp., etc. The notion of Dież that *paragon* originated in Sp., from the prep. phrase *para con* (which is sometimes = 'in comparison with') is historically untenable. But it is not certain whether the original sense of It. *paragone* was 'comparison', or 'touch-stone'; in the latter sense it might stand for *pietra di paragone*. For the etymology, Tobler (*Zeitschr. Rom. Phil.* (1880) IV. 373) suggested derivation from the Gr. vb. *παρακονᾶν* 'to sharpen or whet one thing against another', f. *ἀκόνη* 'whetstone', supposing that this may have developed the sense 'touch-stone', or that the It. vb. *paragonare* may have been formed from *παρακονᾶν*, with the sense of 'try or compare by rubbing together', whence *paragone* the act of doing this, *pietra di paragone* 'comparison stone, touch-stone'. A med.Gr. *παρακόνη* is cited as applied to a smooth hard stone used to polish the gold laid on in illuminating. But the suggestion presents various difficulties.]

paragraph ('pærəgrɑ:f, -æ-), *sb.* Also 6-7 -graff(e. [a. F. *paragraphe* (13th c. in Hatz.-Darm.) = It. *paragrafo*, ad. late L. *paragraphus*, a. Gr. παράγραφος orig. a short horizontal stroke drawn below the beginning of a line in which a break in the sense occurs (see Kenyon *Palæogr.* 27); also = παραγραφή, a passage so marked; f. παρα- by the side + -γραφος written.]

1. A symbol or character (now usually ¶ or ‖) formerly used to mark the commencement of a new section or part of a narrative or discourse; now, sometimes introducing an editorial *obiter dictum* or protest, and sometimes as a reference to a marginal note or foot-note.

Its original use is common in Middle English MSS. (where the form is often a red or blue ◖, ◐ or ◗, ◑). It was retained by the early printers, and remains in the Bible of 1611 (but only as far as Acts xx), no doubt because every verse begins a new line, so that the method of indicating a paragraph by 'indenting' (as done by Tindale, Coverdale, and the Revisers of 1881-5) was not available.

Gram.* (ed. 5) I. 412 A Paragraph ¶ denotes the beginning of a new subject, or a sentence not connected with the foregoing. This character is chiefly used in the Old, and in the New Testaments. 1824 J. JOHNSON *Typogr.* II. iii. 52 At present, paragraphs are seen only in Bibles.

2. a. A distinct passage or section of a discourse, chapter, or book, dealing with a particular point of the subject, the words of a distinct speaker, etc., whether consisting of one sentence or of a number of sentences that are more closely connected with each other than with what stands before and after. Such a passage was at first usually indicated by the mark described above; but afterwards, as now, by beginning on a new line, which is indented or set back by the space of an 'em-quad', and ends without running on to the next passage; hence, in reference to typography or manuscript, a paragraph is a portion of the text between two such breaks; but, in a less technical sense, it is sometimes applied to any passage which, from its nature, might or ought to be so indicated in writing or printing.

3. A short passage, notice, or article in a newspaper or journal, without a heading, or having only a side heading; an item of news.

They might be called paraheliotropic. **1881** DARWIN in *Nature* XXIII. 409/2 With several species of Hedychium, a widely-different paraheliotropic movement occurs.

paraheliotropism (ˌpærəhi:lɪ'ɒtrəpɪz(ə)m). *Bot.* [f. as prec. + -ISM.] A tendency in plants when exposed to brilliant light to turn their leaves parallel to the incidence of the light-rays.

1881 DARWIN in *Nature* XXIII. 409/1 This remarkable movement I have called paraheliotropism. *Ibid.*, F. Müller doubts whether so strongly marked a case of paraheliotropism would ever be observed under the duller skies of England.

parahelium (stress variable). Also parhelium. [f. PARA-[1] 3 + HELIUM.] The form of helium whose spectrum does not exhibit the fine structure of orthohelium, owing to the spins of the two orbital electrons being anti-parallel.

1896 RUNGE & PASCHEN in *Astrophysical Jrnl.* III. 18 We come to the conclusion that clèveite gas consists of two clements, one corresponding to the second and third series (single lines), and the other corresponding to the fifth and sixth series (double lines..). If this is true, the name *Helium* should be given only to the second element... The first element Professor Stoney has proposed to call *Parhelium*. **1903** A. M. CLERKE *Probl. 1965 D. MACDONALD in *N. Y. Rev. Bks.* 26 Aug. 3/1 A new kind of journalism is being born, or spawned. The OF. *paroquet* is held by Darmesteter to be ad. It. *parrochetto*, dim. of '*parroco* parson (cf. *moineau* sparrow, dim. of *moine* monk); but some think the typical It. form to be *parrucchetto*, as dim. of *parrucca* 'peruke, periwig', in reference to the plumage of the head in some species. In Sp. *periquito* is a later dim. of the much commoner name *perico*, supposed to be the same word as *Perico*, colloquial dim. of *Pedro* Peter: cf. PARROT. The relations between the Sp. and It. forms cannot be settled until the chronology is known; prob. the name has been modified by popular etymology in one or both.

As the parrot was known in Italy from Roman times downward, the name *parrochetto*, etc., may have originated there rather than (as sometimes assumed) with the Spanish and Portuguese navigators.]

A bird of the parrot kind; now *spec.* applied to the smaller birds included in the order, esp. those having long tails.

parakite ('pærəkaɪt). [In sense a, f. PARA(CHUTE) + KITE; in b, f. Gr. *παρά* , PARA-[1] beyond + KITE.]

1. a. A kind of large kite constructed so as to be inflated by the wind like a parachute, proposed by Simmons in 1875 for military use. **b.** A kind of tailless kite devised by Woglom in 1896 for various scientific purposes.

1875 *10th Rep. Aeronaut. Soc.* 75 An attempt was made by Mr. Simmons, the aëronaut, to supplement the employment of a balloon in warfare by..a kite, which, from the peculiar nature of its construction, he designated the parakite. It was, in fact, a combination of the parachute and kite. **1895** BADEN POWELL in *Jrnl. 2. In modern use applied to a parachute kite which is towed along against the wind by a motorboat, car, or other fast vehicle. So **'parakiting**, the sport of soaring when harnessed to a parakite.

object from the two different points of view, and constituting a measure of the distance of the object. Also *transf.* (quot. 1881).

In Astronomy there are two kinds of parallax, viz. *diurnal* and *annuol*, the former when a celestial object is observed from opposite points on the earth's *surface*, the latter when observed from opposite points of the earth's *orbit*. As the mean or proper position of the body is that which it would have if viewed in the one case from the earth's centre (or a point in a line with it), in the other case from the centre of its orbit, the parallax is actually calculated and stated from these central points, and called *geocentric* and *heliocentric* respectively, the base lines of these being the earth's radius and the radius of its orbit. *horizontal parallax*: the diurnal parallax of a heavenly body seen on the horizon.

1909 in *Cent. Dict.* Suppl. **1973** *Nature* 21/28 Dec. 445/1 Only above 100 K does the material become a self-respecting paramagnet, with thermally randomised spins.

paramagnetic (pærəmæg'nɛtɪk), *a.* and *sb.* [f. Gr. *παρα-* in sense 'alongside, parallel' + MAGNETIC.]

A. *adj.* †1. Having the property of being attracted by the poles of a magnet, and hence, when suspended or placed freely in a magnetic field, of taking a position parallel to the lines of the force; also *ferro-magnetic*: opp. to DIAMAGNETIC. *Obs.* (superseded by the next sense).

Faraday at first (1846) distinguished *dionagnetic* from *mognetic* bodies; afterwards (1850–51) he called the latter *paramagnetic*, using *mognetic* to include both.

1850 W. WHEWELL *Let.* (1876) II. 364 [*To Foradoy.*] Hence it would appear, that the two classes of magnetic bodies are those which place their length *porollel* or *occording* to the terrestrial magnetic lines, and those which place their length *transverse* to such lines. Keeping the preposition *dio* for the latter, the preposition *para* or *ona* might be used for the former; perhaps *pora* would be best as the word *parallel*..would be a technical memory for it. Thus we should have this distribution—Paramagnetic: Iron, Nickel, Cobalt, &c. Diamagnetic: Bismuth, Phosphor, &c. If you like *anomagnetic* better than *poromagnetic*, as meaning magnetic *according to* our standard, terrestrial magnetism, I see no objection. **1851** FARADAY *Exp. Res. in Electr.* No. 2790 in *Phil. Trons.* 26 As the magnetism of iron, nickel, and cobalt, when in the magnetic field is like that of the earth as a whole, so that when rendered active they place themselves parallel to its axis or lines of magnetic force, I have supposed that they and their similars (including oxygen now) might be called paramagnetic bodies, giving the following division—Magnetic: (1) *Paromagnetic*, (2) *Diamagnetic*. *Ibid.* No. 2834. 39 Masses of paramagnetic matter. **1855** MAURY *Phys. Geog. Sea* vi. (1858) §376 Faraday has shown that, as the temperature of oxygen is raised, its paramagnetic force diminishes, being resumed as the temperature falls again. **1880** [see FERROMAGNETIC *a.* 1]. **1895** STORY-MASKELYNE *Crystollogr.* i §13 Unmagnetised bodies if brought near a magnetic pole are either attracted or repelled by it, and are said to be magnetised by induction; being described in the former case as paramagnetic and as diamagnetic in the latter case.

2. a. Of a body or substance: very weakly attracted by the poles of a magnet but not retaining any permanent magnetism; having a susceptibility that is positive but small, so that the relative permeability is only slightly greater than one and hysteresis does not occur. b. Characteristic of or pertaining to paramagnetism. Cf. FERROMAGNETIC *a.* 2 and the note there.

1896, etc. [see FERROMAGNETIC *a.* 2.]. **1902** *Encycl. Brit.* XXX. 430/2 The magnetic susceptibility of a vacuum..is o, that of a diamagnetic substance..has a negative value, while the susceptibility of paramagnetic and ferromagnetic substances..is positive. **1903** *Proc. R. Soc.* LXXI. 239 The law of Curie, that the susceptibility of weak paramagnetic substances is inversely proportional to the absolute temperature. **1931** S. R. WILLIAMS *Mog. Phenomeno* v. 159 Oxygen, palladium, air, glass, porcelain, and $FeSO_4$ were some of the paramagnetic bodies studied by Curie. **1958** N. CUSACK *Electr. & Magn. Prop. Solids* xii. 269 At a critical temperature, called the Curie point.., ferromagnetic matter undergoes a phase transition and becomes paramagnetic. **1966** C. R. TOTTLE *Sci. Engin. Materials* vi. 133 Curie.. deduced the law for paramagnetic susceptibility.

B. *sb.* A paramagnetic body or substance.

1855 *Phil. Mog.* IX. 293 The assertions I have made regarding mutual influence..are confirmed amply by experiment for paramagnetics. **1911** *Encycl. Brit.* XVII. 324/1 Between the ferromagnetics and the paramagnetics there is an enormous gap. **1914, 1962** [see FERROMAGNETIC *sb.*]. **1966** C. R. TOTTLE *Sci. Engin. Moterials* vi. 134 The group of elements iron, cobalt, nickel demonstrates this. Below a certain critical temperature these elements remain permanently magnetized after removal of the external field. .. Above it, the materials behave as normal paramagnetics.

Hence **paramag'netically** *adv.*

1883 *Encycl. Brit.* XV. 248/2 By virtue of differential action, a body may behave paramagnetically or diamagnetically according as it is placed in a less or in a more permeable medium than itself. **1974** *Noture* 31 May 426/1 The reduction at 25° C of the cytochrome c_3 from *Desulfovibrio vulgaris*..has been studied by following the paramagnetically shifted NMR resonances which lie to very low field.

paramagnetism (pærə'mægnɪtɪz(ə)m). [f. PARA-¹ 1 + MAGNETISM, after PARAMAGNETIC *a.* and *sb.*] The quality of being paramagnetic; the phenomena exhibited by paramagnetic bodies: opp. to DIAMAGNETISM. Now distinguished from FERROMAGNETISM, but formerly synonymous with it.

1850 W. WHEWELL *Let.* (1876) II. 365 [*To Faraday.*] Will it not do to talk of iron, nickel, &c., as *paromagnetic*, and glass, phosphorus, &c., as *diomognetic*? Then this new

branch of science, for so, of course, it will soon become, will be *Paramagnetism*. **1851** W. GREGORY *Lect. Anim. paramatta (pærə'mætə). [f. Paramatta (prop. Parramatta), a town in New South Wales.

There formerly existed at Parramatta a convict establishment in which clothing materials were produced: cf. *Encycl. Brit.* (ed. 7) XVII. 65/2; perhaps the modern stuff (which according to Beck *Draper's Dict.* was invented at Bradford) was in imitation of these; there is no evidence for the assertion that the fabric was orig. made of wool imported from Parramatta.]

1. *Law.* Those articles of personal property which the law allows a married woman to keep and, to a certain extent, deal with as her own.

The word *parapherna* was used by the Roman jurists to indicate all property which a married woman *sui juris* held apart from her *dos* (dower). Over such property the husband could exercise no rights without his wife's consent. In most modern systems of law, based on the Roman, *paraphernalia bona* (in Fr. *biens paraphernaux*) means much the same thing, but in English and Scottish Common law, under which all personal or movable property of a wife vested *ipso jure* in the husband, the *paraphernalia* became restricted to such purely personal belongings of a wife as dress, jewels, and the like. These latter were regarded as, in a sense, appropriated to the wife, and on the husband's death they were not treated as part of his succession, and the right of a trustee over them, in the event of the husband's bankruptcy, was restricted. But in neither England nor Scotland did *paraphernalia* strictly include articles in the nature of household furniture, even though these had been marriage presents to the wife. The effect of the 'Married Women's Property Acts' of 1870, etc., was to deprive the term of all significance in English and Scottish legal practice.

1927 P. GEDDES in A. Defries *Interpreter* viii. 199 In all the great cities..you have in progress the history of Rome in its decline and fall. Gr. *παρασύνεσις* misunderstanding, f. *παρα-* in sense 'amiss, wrong' + *σύνεσις* understanding.] Misunderstanding or misconception of a word, resulting in an alteration or corruption of it. Hence **parasynetic** (-sɪ'nɛtɪk) *a.*, pertaining to or due to parasynesis.

1877 HALDEMAN *Outlines Etymol.* 31 Parasynesis, a misunderstanding or misconception of a word all of which is present, as when 'Chinese' is supposed to be a plural, and capable of furnishing 'Chinee' in the singular number. **1885** *Trans. Amer. Philol. Assoc.* XVI. App. 32 Such parasynetic forms as 'sparrer-grass' for 'asparagus', due to.. misconception of a word, are common enough in Negro.

parasynovitis, -syphilitic, etc.: see PARA-[1] 1.

‖**parasynthesis** (pærə'sɪnθɪsɪs). *Philol.* [mod. a. Gr. *παρασύνθεσις*, f. *παρα-* beside, alongside + *σύνθεσις* composition, SYNTHESIS.] Derivation from a compound; conjoint combination and derivation, as a process of word-formation: see next.

1862 CHANDLER *Grk. Accentuation* Pref. xii, It is said that synthesis does, and parasynthesis does not affect the accent; which is really tantamount to saying, that when the accent of a word is known..we shall be able to judge whether a Greek grammarian regarded that word as a synthetic or parasynthetic compound. **1884** *Amer. Jrnl. Philol.* July 193 The principle of parasynthesis..is more regularly and extensively developed here [in Portuguese] than in any other one of the Romance group of languages.

parasynthetic (pærəsɪn'θɛtɪk), *a.* (*sb.*) *Philol.* [mod. f. Gr. *παρασύνθετος* 'formed from a compound' (f. *παρα-* beside + *σύνθετος* put together, compounded) + -IC. In mod.F. *parasynthétique.*] Formed from a combination or compound of two or more elements; formed by a conjoint process of combination and derivation. **b.** *sb.* A parasynthetic formation or derivative.

Applied, esp. in Romanic Philology, to verbs derived from a combination of preposition and object, with the addition of a verbal ending, as *aborder* from phr. *à bord*, *aboutir* from *à bout*, *endosser* from *en dos*, etc.; also to the derivatives of these, as *en-table-ment*, etc. Many of these parasynthetic derivatives have entered Eng. from French, e.g. *accost*, *embark*, *endorse*, *imprison*; but native formations of this kind are rarely if ever made in Eng. Our parasynthetic derivatives chiefly consist of adjs. and sbs. formed by combining two words in some grammatical relation, and adding to the combination a formative suffix; e.g. from *black eye*, *black-eyed*, from *silk hat*, *silk-hatted*, from *all ages*, *all-aged*, from *big end*, *big-ender*, from *free trade*, *free-trader*, from *at home*, *at-homeish*, *at-homeishness*, *at-homeness*, from *get at*, *get-at-able*, etc. Thus *black-eyed*, *big-ender*, etc., notwithstanding the hyphen, are not formed from *black + eyed*, *big + ender*, etc., but from *black eye + -ed*, *big end + -er*, etc., the suffix indicating a formation not upon the element next to it, but upon the combination of the two elements, which, of themselves, without the suffix, are only in grammatical collocation.

1862 [see prec.]. **1884** (April) *N.E. Dict.* s.v. *Ash* sb.[2], 8. *Comb.* a. In a similative relation..passing into parasynthetic compounds, as *ash-bellied*..*ash-coloured*. **1884** A. M. Philol.* July 186 (*heading*), Verbal parasynthetics in *a-* in the Romance languages. *Ibid.* 187 That species of word-creation commonly designated as parasynthetic covers an extensive part of the Romance field, both in its noun and verb-development, and is usually found more abundant in the later than in the earlier periods of these languages. *Ibid.* 192. *Ibid.* 194.

paratonal (pærə'təʊnəl), *a. Linguistics.* [f. PARA-[1] + TONAL *a.*] Ancillary to tone; *spec.* of or pertaining to a range of features, excluding pitch, associated with a particular tone.

1966 H. L. SHORTO in C. E. Bazell *In Memory of J. R. Firth* 399 The paratonal register distinction is broadly similar to that described for Cambodian by Henderson. Its exponents are distributed throughout the articulatory complex but exclude pitch features.

paratone ('pærətəʊn). *Linguistics.* [f. PARA-[1] + TONE *sb.* 1.] A postulated tonal unit of a sequence of simple tone-groups, in which information concerning sentence-type, the speaker's attitude, etc. is conveyed. Also *attrib.* Hence **parato'nality; parato'nicity.**

1973 A. FOX in *Archivum Linguisticum* IV. 21 As far as the paratone-group is concerned, we may identify three kinds of choice which parallel exactly those applicable to the tone-group. By the side of tonality we may have 'paratonality', which is concerned with the number of paratone-groups in the utterance. Since the position of the major tone-group within the paratone-group is variable, we must also have a 'paratonicity' system to locate it..; and parallel to the choice of tone we may have a choice of 'paratone', that is, of the specific tone-sequence to be used.

2. *Bot.* a. [First formed in this sense as G. *paratonisch* (J. Sachs *Lehrb. der Bot.* (1868) III. i. 517).] Applied by Sachs to the effect of the varying intensity of light in causing the movements of 'waking' and 'sleeping', *i.e.* opening and closing of the leaves, etc. in certain plants; in general, applied to plant movements caused by external stimuli (e.g. tropisms and kineses). b. Applied to movements of leaves, or of growing organs, caused by external stimuli, as light or mechanical irritation. c. Applied to the effect of light in retarding growth in most growing organs, as district from its stimulating effect on leaves.

1875 BENNETT & DYER tr. *Sachs' Bot.* 677 In most leaves endowed with periodic movements the paratonic influence of light is so strong that it neutralises them. *Ibid.* 678 Both the periodic and paratonic movement..is lost when they [the plants] have remained in the dark for a considerable time, such as a whole day; in other words, they become rigid by long exposure to darkness. **1878** M^cNAB *Bot.* 136 In other cases the nutations are due to the action of external causes on growth. Such nutations are called paratonic or kinetic. **1910** J. M. COULTER et al. *Textbk. Bot.* I. II. 454 The terminal leaflet of *Desmodium gyrans*, like leaves of other members of the bean family, exhibits paratonic movements (i.e. those due to special stimuli, not tonic; opposed to autonomic). **1973** A. CRONQUIST *Basic Bot.* xxvi. 412/2 Some growth movements are self-controlled (autonomic); others are induced by external stimuli (paratonic)... Paratonic movements are further classified as tropisms and nasties.

A more plausible conjecture would see in it a repr. of L. *persiccāre* to dry thoroughly; cf. obs. F. *parseicher* (Godef.); but here also the historical and other difficulties appear to be too great.]

pareschatology (ˌpærɛskə'tɒlədʒɪ). *Theol.* [f. Gr. παρέσχατο-ς penultimate + -LOGY.] A term introduced for theories about human life after physical death and before the final resolution.

1976 J. HICK *Death & Eternal Life* i. 22 Whereas eschatology is the doctrine of the *eschata* or last things, and thus of the ultimate state of man, pareschatology is, by analogy, the doctrine of the *para-eschata*, or next-to-last things, and thus of the human future between the present life and man's ultimate state. *Ibid.* iv. 34 The rather rare Greek word *pareschatos* means 'penultimate' or 'next-to-last', and enables us to coin 'pareschatology' as the study of the next-to-last things, on analogy with 'eschatology', the study of the last things. I am grateful to my colleague Michael Goulder for this useful word. **1977** *Theol. Pareto (pæ'reɪtəʊ, -'i:təʊ). The name of the Italian economist and sociologist, Vilfredo *Pareto* (1848–1923), used *attrib.* and in the possessive to indicate his theories or methods and esp. the law, or mathematical formula, in which he claimed that the distribution of income for any society could be expressed.

1920 A. C. PIGOU *Econ. of Welfare* v. ii. 699 When these points are conceded, the general defence of 'Pareto's law' as a law of even limited necessity rapidly crumbles. **1930** E. R. A. SELIGMAN in *Political Sci. Q.* XLV. 341. His *Cours d'economie politique*.. contained among other notable contributions the first formulation of the principle which subsequently became known as Pareto's law. This was a generalization which attempted to express the relation between the amount of income and the number of its recipients. **1937** YULE & KENDALL *Introd. Theory Statistics* (ed. 11) vi. 100 In economic statistics this form of distribution [*sc.* the extremely asymmetrical] is particularly characteristic of the distribution of wealth in the population at large.., and the curve to which it gives rise has been called the 'Pareto line', after Vilfredo Pareto. **1949** [see ERGODICITY]. **1962** *Times Lit.
